HARD SKILL

- Manual Testing
- Core Java
- Automation Testing using selenium webdriver
- Performance Testing
- TestNG Framework
- Basic SQL
- Jenkins
- Git

SOFT SKILL

- Creativity
- Adaptability
- Analytical and problem solving skill

CERTIFICATE

Software Testing(INTERN)-MICROSCRIPT
SeleniumWebDriver-Udemy
Performance Testing-Udemy

PROFILE

As a fresher, I am seeking to secure a position in an organization where I can use my educational background and experience to contribute to the success of the company. I am an enthusiastic individual with an eagerness to learn and develop my skills in the workplace. I have excellent communication and interpersonal skills, and I am able to work effectively in a team environment. My ambition is to build a successful career within the company and to become an asset to the organization. I am confident that my enthusiasm and commitment to excellence will be of great benefit to the organization.

EXPERIENCE

2022

Microscript

SOFTWARE TESTER(INTERN)

- Developed and implemented test cases to ensure the quality of the software
- Investigated system requirements and designed test plans
- Helped in developing and executing manual and automated test scripts.
- Examined and explored software specifications to ensure they meet customer requirements
- Gained knowledge on different testing methodologies like white box, black box and functional testing.
- Diagnosed applications to identify and rectify errors
- Explored software performance and produced test reports
- Cooperated with software developers to identify areas of improvement
- Recorded software development processes and best practices
- Utilized bug tracking tools such as JIRA to track and report defects.
- Investigated and documented software defects and reported them to the development team.

TECHNICAL SKILL SET

- Knowledge of software development life cycle (SDLC)
- Knowledge of software testing lifecycle (STLC)
- Ability to create and execute test plans and test cases
- Knowledge of various testing techniques like boundary value analysis, equivalence partitioning, etc.
- Knowledge of using the JIRA tool for test cases and defect reporting
- Knowledge of programming fundamentals and object-oriented programming.
- Ability to develop and design automation tests using Selenium WebDriver.
- Ability to develop and execute test plans, test cases and test scripts using TestNG.
- Knowledge of performance testing using JMeter.
- Ability to develop, execute and analyze performance tests using JMeter.
- Extensive knowledge of Jenkins for Automation Testing
- Practical experience in using Jenkins for Continuous Integration and Continuous Delivery (CI/CD) pipelines.
- Knowledge of the Git version control system.
